

# Proposed Independence Energy Connection Project

## 9a Project

Filed with MD PSC and PA PUC Winter 2017

- Proposed new substation
- Proposed West route
- Proposed East route
- Proposed upgrades to existing BG+E substation

## Reconfigured 9a East Alternative

Proposed Fall 2019

- Proposed new substation
- Proposed new transmission line
- Proposed upgrades to existing PPL and BG+E transmission lines
- Proposed upgrades to existing BG+E substation

— Existing 500 kV lines

*In Summer 2019, Transource worked to balance input from stakeholders in Pennsylvania and Maryland and further evaluated alternatives for the East segment of the IEC project, ultimately proposing an alternative configuration in York and Harford Counties where portions could use existing facilities. This alternative will be reviewed by the state commissions for consideration as an eastern alternative, along with the originally proposed IEC "9a" project.*
